Allies Will Keep Army of Occupation

London, Jan. 26.—Anticipating an announcement to be made on Thursday by a conference of Sir Eric Geddes (former first lord of the admiralty), Field Marshal Haig and Major Gen. Henry H. Wilson, chief of the general staff of the British army, now meeting in Paris, a statement issued by the war office tonight says:

"The proposals of the conference will make sure that we have in every theater of the war sufficient forces during the present year to see that we are not robbed of our victories, and that the Germans and their confederates execute faithfully and punctually the conditions and only of the armistice, but the treaty of peace, when that is signed, and they will also enable us to discharge our duty towards our allies and those dependent upon us."

"The task to be undertaken is therefore the formation and maintenance of armies of occupation of moderate size, compared with what we now have, but of the highest discipline and efficiency, which will discharge our duty and safeguard British interests during the period which must elapse before the ordinary peace time volunteer army can be created."

"The pay of the army of occupation must be substantially advanced, while the present armies will be continued to be demobilized as quickly as possible."

I. O. O. F. Installation

On Monday of last week G. W. Ringrose, D. D. G. M., assisted by brethren from Staveland, installed the following officers in Foothills Lodge No. 13, I. O. O. F.:

J. A. Harrison, J. P. G.
H. Sprague, N. G.
D. A. Anderson, V. G.
G. W. Ringrose, R. and F. S.
J. W. Morrow, Treas.
J. E. Moffatt, R. S. N. G.
R. E. Moffatt, L. S. N. G.
W. McLennan, R. S. V. G.
R. Wilkie, L. S. V. G.
E. H. Meek, Warden.
A. E. Strange, Conductor.
E. G. Butler, Chaplain.
J. A. Harrison, I. G.
H. A. Annable, O. G.
J. A. Harrison was elected delegate to the coming session of the Grand Lodge.

If every person who is in a financial position to do so will lend a few dollars to the government by investing in war savings stamps, it means millions to the government, helps to finish the war debt, and helps to maintain our national prosperity.

CLARESHOLM LOCAL NEWS

Miss Braren was home for Saturday and Sunday visiting her parents. She has been very busy working for the city board of health at Calgary, and has had a very strenuous time during the "flu" epidemic.

The Fulton Mfg. Co., making ladies' suits and coats, are sending their representative to demonstrate these garments at Annable's store on Saturday. All the ladies of the town are cordially invited to come and see this up-to-date spring line and if pleased to give us their orders.

Pte. "Scotty" Henderson returned from France on Monday night. He has been in France since early in the war and has been wounded twice. Previous to signing up he was working in the foothills for a number of years. His old friends are pleased to see him home safe again.

Sergeant Gerald McLean spent a few days here this week visiting his sister Mrs. Geo. Barber. He has recently returned from a lecture trip to the United States where he has met with great success. He will return to the States next week and will continue his lectures there for another two or three months.

Minister of War Assumes Command of German Army

Amsterdam. — Supreme command of the German peace army has been transferred from the people's commissioners to the minister of war, who will be responsible to the government. The transfer was made with the approval of the council of workers' council, which will still be responsible for all social and economic regulations concerning the army.

Officers will in future wear a dark blue stripe on the left sleeve. All other distinctive marks have been abolished. The obligation to salute is reciprocal, but has been abolished in the big cities.

Great Britain May Restore Mesopotamia

In the Future It May Become a Great Country

London. — Improvements of great importance have been made in the channel State of Arab, which is the river formed by the confluence of the Euphrates and Tigris rivers, according to the Journal of the Mesopotamian board of trade. The great steamers will now go up the river from the Persian Gulf as far as Nahr, which is about twenty miles above Basra.

Part of the Journal is devoted to the irrigation projects which are now being carried out in the valley of the Euphrates. Regarding the immense benefits which might be derived from systematic irrigation, the Journal says:

"In olden times lower Mesopotamia, as the result of artificial irrigation was a forest of perennial verdure and a country of great cities thrived upon it. The dread hand of the Turk has pressed heavily upon Mesopotamia and its people. In the past it was a great country. In the future it may again become a great country, but at present it is a wasteland. Yet the rich soil retains life. A wonderful recovery is within possibility and Great Britain has solved more difficult problems in the empire than are presented by the restoration of Mesopotamia."

Sinn Feiners Killed Two Policemen

Dublin. — The Sinn Féin parliament passed a one-day session. Its members held a brief meeting at the Mansion house, but behind closed doors. Afterwards, Count Hunkert told the reporters that a statement of the business transacted would be furnished to the press later, thus following the precedent of the Paris conference.

A group of a hundred young men gathered outside during the secret session, but no excitement of any kind was shown. The public was far more interested in the murder of two policemen in Tipperary at the time the Paris conference.

Farmers Want Men Released

Winipeg. — Immediate release of all soldiers and sailors in Canada who are required on Manitoba farms is demanded by farmers of the province. A strongly worded resolution to this effect was unanimously passed at the Union of Manitoba Municipalities convention here. It will be sent to Ottawa immediately. Hon. Arthur Meighen, minister of the Interior, declared that in his opinion the request of the municipal convention should be granted, and he will take up the matter immediately on his arrival in Ottawa.

It is the struggle to keep up appearances that keep some persons down.

Congress Wants Russia To Settle Internal Difficulties

Paris. — Led by President Wilson, the supreme council of the great powers moved to unite the factions of distracted Russia and bring them into the peace congress.

They unanimously adopted a proposition brought forward by President Wilson, asking all the Russian factions, including the Bolsheviks, to meet the allied and associated governments at Prince's Islands in the Sea of Marmora, on February 15, the confiding factions meantime declaring a truce and suspending all military operations.

Aside from the importance of the negotiations reached, it was especially notable as being the first time that

Irish Peace Delegates

Dublin. — According to the provisional constitution of the Irish republic, now before the "Dail Eireann," legislative powers are to be vested in deputies elected from existing parliamentary constituencies. The ministry will consist of a president and four executive officers — secretaries of finance, home affairs, foreign affairs, and national defense. All revenues will be raised on the vote of the "Dail Eireann," the constitution may be altered upon seven days' notice. Count Plunkett, Professor Edward De Valera and Arthur Griffith will probably be appointed Irish members of the peace congress.

Germans Wanted a Short Cut to Peace

Bombs From Air Were a Nightmare to Them

London. — First hand information as to the results of the German air attacks gives a vivid idea of why the Germans, as the British aerial strength developed, wanted to find a short cut to peace.

"One goes amazed at the gigantic work involved in the defensive fortifications of the German air force," says a writer back from Berlin. "Bombs from the air became a nightmare to the Germans. All the deck area is full of bomb holes. Pontoon, sheds, barracks and docks covered with reinforced concrete are in ruins. One heavy bomb struck a destroyer in a gunnery dock and destroyed both vessel and pontoon. Another pontoon was so badly damaged that the Germans blew it up, together with the submarine in it. The latter now lies in halves, the bow in the remains of the pontoon and the stern blown on the bank of the canal."

Arms Found By Government

Will Consider Regulations Regarding 1,000 Bolsheviks

Warsaw. — Several thousand rifles, many machine guns and thousands of hand grenades, intended for use in an attempt to overturn the Pilsudski government, which has now been succeeded by the Paderki government, were discovered in Warsaw. The government authorities also are said to have found a number of arms were made in an effort to secure official elections to the national assembly.

Prince Sapieha, who led the brief and futile attempt against the Pilsudski government a fortnight ago, is said to have been released when the political situation became settled. However, there is no law under which he can be prosecuted.

State of Hejiaz Wants Autonomy

Paris. Prince Feisal, a son of the king of the Hejraz, has completed a memorandum for presentation to the peace conference asking complete independence and autonomy for the Arabian state of the Hejraz to consist of Syria, Upper Mesopotamia, Lower Mesopotamia, Yemen and Said. The territory of Nadj is a tribal state. The prince invites the peace conference to send a commission to these districts to ascertain the real desires of the people.

Berne. — "President Wilson will achieve a workable and feasible league of nations and with the full strength and influence of Great Britain he will solidly behind him," Arthur Henderson, British labor leader, declared to the Associated Press.

Club Must Still Be Held Over Huns

Taft Declared League of Nations Necessary

St. Catherine, Ont. — "We were fighting, not the Hohenzoferns alone, although they were leading, but we were fighting the German people, who were preoccupied with the doctrine of world domination," declared W. H. Taft, former United States president, in a lecture here. "A surgical operation was needed, not by a sharp instrument, but a club. This we have done, and we must do it again, for their application if necessary, in fact it should later develop that a radical cure has not been effected."

Mr. Taft declared that, "if we are to clinch our purposes in the war, a league of nations is necessary." A movement is on foot to open a series of conventions to educate the American people to the need of such a league by the holding of nine conventions in as many cities in various sections of that country in February, and he had decided to try it on Canada first.

Express Disappointment

Paris. — Mr. P. M. Maier, premier of New Zealand, and Sir J. G. Ward, minister of finance of New Zealand, have arrived in Paris and expressed disappointment at the decision of the supreme council to give the country only one delegate at the peace conference. The New Zealand ministers represent two different parties in New Zealand and both wish to be present at the conference. They would endeavor to have the decision changed so that both could attend the peace sessions.

Coal Miners Strike

Whole Yorkshire Coal Field Probably Will Be Idle

London. — Industrial unrest throughout the United Kingdom is on the increase. In addition to the threatened railway strike the whole Yorkshire coal field probably will be idle, since 15,000 men out of employment, while preparations are being made in Scotland for a general strike of a 40-hour week.

The cause of the trouble in Yorkshire is somewhat similar to that which is occurring in other parts of the country. The operators there have locked out some 40,000 men who insisted on taking twenty minutes of the employers' time for meals.

In reply to the lockout the Yorkshire miners' association has declared a strike. The dispute in London between the engineers and their employers has improved somewhat. Some of the employers have granted the demands of the engineering trade, but the electrical workers are now threatening to strike.

May Export Low Grade Flour

Ottawa. — The Canada food board has notified all millers in Canada that special permits will now be granted for those applying allowing them separation of flour into intermediate grades, low grades and other flour extractions, provided such flour is only sold outside of Canada, to West Indies, Central and South America. Permits for the export of flour to these countries will be freely granted for single use or for repeated use, as well as for export to Newfoundland, in order to meet the requirements of the Newfoundland food board, will be granted for standard flour only.

Survey Aerial Route

Melbourne. — It is announced that the Commonwealth government has sanctioned the formation of a committee to survey an aerial route between Australia and the Far East.

Contracted a Mock Marriage

So as to Become a German and Be Immune from Expulsion

Rosa, How Rosa Luxemburg, the dead Spartan leader of Berlin, managed to gain German citizenship is related by the Tagblatt of Berne. Rosa, who had been expelled from Russia for activities among the Jews there, was living in Zurich when he decided to go to Germany to propagate Socialistic ideas. She was warned that she would be expelled, so she sought a lawyer in Zurich and demanded to know whether it was possible to contract a mock marriage with a German citizen so as to become a German herself and be immune from expulsion. The lawyer said there would be some difficulties as to obtaining a man to go through such a ceremony.

Plans Coming to Canada

London. — The air ministry will hand over to the Canadian government through Sir George Perley, the three internal airlines, as authorized by citizens of Glasgow, Leicester and Paderfield and presented to the Canadian government. These airlines are the air lines of the world, made in the cities concerned, have been in use for war purposes but the air ministry will now produce replicas of them to go to Canada.

Crisis in Argentina

Radical Party Will No Longer Be Responsible for Acts of President

Buenos Ayres. — La Provincia says that the radical party is reorganizing and is preparing to issue a declaration that it will no longer be responsible for the acts of the Hipolito Yrigoyen, the president of the republic.

PROUD OF ACHIEVEMENT

Greatest Change in Habits of People Ever Recorded

London. — "I am constantly receiving reports from British Columbia that the splendid results of prohibition," writes Bishop Perrin, formerly Bishop of British Columbia. "A great deal of good has been done, and now concerning prohibition in the United States. The Times, however, editorially remarks:

"It seems hardly to be understood here that prohibition in America has not yet actually taken place. Meanwhile, in this country, where we have followed a more moderate policy, the Times continues, 'there has been wrought the greatest change in the habits of the people ever recorded and the greatest reduction in drunkenness ever accomplished in any country. This is the one triumph of the temperance cause as to which there are no honest men who doubt. Others have been held up to our admiration as patterns to follow, but none have shown such results as we. There are no more men showing when any of our neighbors can show a positive record that will compare with it. It will be time enough to set their achievements.'"

Rosa soon produced a German, known as Dr. Lubeck, and authorized her on payment of ten francs, Rosa immediately left her husband and went to Germany. Lubeck later was expelled from Switzerland as an undesirable foreigner.

Plans Coming to Canada

London. — The air ministry will hand over to the Canadian government through Sir George Perley, the three internal airlines, as authorized by citizens of Glasgow, Leicester and Paderfield and presented to the Canadian government. These airlines are the air lines of the world, made in the cities concerned, have been in use for war purposes but the air ministry will now produce replicas of them to go to Canada.

Portuguese Are Concerned Over African Colonies

Interested in Dominions

Paris. — The announcement of the aspirations of the British Dominions is being discussed with the keenest interest in official circles in Paris. The question is being frequently asked whether this present important step is to be followed later by insistence on the part of the Dominions of a right as nations to have a full share in dictating the foreign policy of the empire so far as it affects the Dominions.

The British empire is in one sense a national entity and in another a league of nations in itself," was the way one high official summarized the situation.

Do Not Share in War Gratuities

Next of Kin of Deceased Soldiers Provided for Under Pension Regulations

Ottawa. — There is absolutely no truth in the statement appearing in certain newspapers that the war service gratuity payable to widows of the C.E.F. on retirement or discharge will also be paid to war widows, dependents and next of kin of soldiers killed in action or who died of wounds.

An official denial of this statement was issued by the militia department, and at the same time it was pointed out that the order in council makes no provision of this nature. The next of kin of deceased soldiers are provided for under the pension regulations.

The order in council does, however, make provisions for payment of gratuity to the dependents of a soldier who dies subsequent to his discharge or retirement, and before he or his dependents have received any part or the whole of the gratuity. It states that if there survive some dependents of the gratuity equal to pension allowance the portion of the gratuity unpaid at the time of his death should be payable to such dependents. In the case of a soldier who has no dependents entitled to separation allowance, and who dies subsequent to discharge before receiving any or the whole of the gratuity, the portion of the gratuity unpaid at the time of his death shall not become payable.

There are no more men showing when any of our neighbors can show a positive record that will compare with it. It will be time enough to set their achievements.'"

Sinn Feiners Desired to Attract General Attention

Dublin. — Comments of the Irish papers on the parliament are to the effect that it was an empty hearing of the air and that its special purpose was to attract the attention of the world, particularly of the peace conference, to the Sinn Féin cause.

The Irish censorship prevented the appearance of the Sinn Féin's declaration of independence in the Dublin papers. Without interference, the lord mayor of Dublin, Lawrence O'Sullivan, having declined to resign from the government, will proceed to Paris to tender to President Wilson the freedom of Ireland, to the Sinn Féin cause.

The gist of the newspaper comment is that if Count Plunkett, recently voted by the corporation,

Paris. — Portuguese circles in this city are greatly concerned over the situation in their country. They fear especially that their possessions in Africa, forming the third largest colony in the world, may be lost. They come into question and that some European state may point out that Portugal, being in a state of anarchy, is unfit to rule other peoples.

The Portuguese hope that the delegates attending the peace congress will realize the sacrifices sustained by Portugal, which they say were very great compared with the size of the country and its wealth.

They say that Portugal asks "only to keep what it already possesses." The official journal of the Lisbon government has promulgated a decree inflicting heavy fines upon the districts of Oporto, Viana and Braga where the monarchists have been in control. The fines vary from \$50,000 to \$100,000 for every day the districts remain in a state of rebellion.

Bismarck Had Plans

To Destroy France

Document Found Recently Among Papers of French Literary

Paris. — Prince-Bismarck contemplated a second war by Germany against the French, which would result in the virtual destruction of France, according to a document published in the Petit Parisien. The document, a letter, was one made by the ex-convict of the then King of Hanover, summing up a conversation with Bismarck, and is stated to have been found recently among the papers of a French literary man.

"I am positive that if I live long enough I am destined to destroy France," Bismarck is quoted as saying. "For in another war I will take from her colonies and her fleet, not to mention billions, and will decimate her a second time. For this purpose I am going to prepare the German people to become more powerful."

Crisis in Argentina

Radical Party Will No Longer Be Responsible for Acts of President

Buenos Ayres. — La Provincia says that the radical party is reorganizing and is preparing to issue a declaration that it will no longer be responsible for the acts of the Hipolito Yrigoyen, the president of the republic.

FRIDAY, JANUARY 31, 1919

Notice to the Readers of The Review-Advertiser

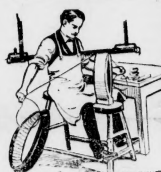

Owing to the enormous increase in the cost of news-print paper, The Review-Advertiser has been reluctantly forced to advance its subscription rates from \$1.50 per year to \$2.00 per year.

The Review-Advertiser is one of the largest users of paper amongst the weekly newspapers published in the province of Alberta, and is therefore using a very large quantity of white paper, which is now costing add down in Clareholm over eight cents per pound.

To accommodate its readers and advertisers The Review-Advertiser will hereafter be published on Thursdays instead of being published on Fridays as heretofore. This will give the readers and advertisers the advantage of having the latest news and advertising at the earliest possible moment, which it feels sure will be appreciated.

Save—help yourself and Canada by investing in war savings stamps.

SHORT COURSES

—IN—

Practical Agriculture and Domestic Science

AT THE

PROVINCIAL SCHOOL OF AGRICULTURE

CLARESHOLM, Alberta

—FROM—

February 17 to 28 Inclusive

A Short Course in Practical Agriculture will be given to farmers and a Short Course in Domestic Science will be given to women, FREE, at the Clareholm School of Agriculture from February 17th to 28th, inclusive.

The course in Agriculture includes Gas Tractor work, Live Stock Judging, Grain Judging, Blacksmithing, Veterinary Science, Weeds, Soil Cultivation, and Soil Management.

The course in Domestic Science includes practical demonstrations in Cooking, Sewing, Home Nursing, Dairying, and Poultry.

ALL ARE INVITED TO ATTEND

The cost of ALBERTA
MUNICIPAL HAIL INSURANCE
is so low that no farmer can
afford to be without it--

Consider this. Over a period of five years (1914-18) The Alberta Municipal Hail Insurance District has carried a total of \$33,000,000.00 of insurance at an average premium of less than 5%. During that time the average cost of operating expenses was only a trifle over five cents on the dollar. The new plan promises even better results.

As there are no profits to be made or dividends to be paid, it provides the opportunity for fair adjustment of all claims on the basis of actual damage done.

You will save money by voting for Municipal Hail Insurance at the forthcoming Election.

For further information see your Secretary-Treasurer, or write

The Hail Insurance Board

Claresholm Local News

Born, to Mr. and Mrs. Joe Best, on
Monday, a boy.

One of J. Chilton's boys is reported
to be very ill with double pneumonia.

Mrs. W. Koran, daughter of Mrs.
Best, left on Thursday last for Laura,
Bark.

Born, to Mr. and Mrs. Stanley
Carey, on Wednesday, January 22nd,
a girl.

Mr. R. Redfern, Sr., left for Ontario
for the balance of the winter last
Thursday.

Mrs. R. C. Clifford is selling her
household goods, etc., on Saturday,
January 1st.

Dr. R. M. Riggs and Miss Ruth
Simpson attended the grand open at
Calgary last week.

Miss Eva Moffatt has left the Union
Bank for home and will spend
the rest of the winter in Manitoba.

Oliver Mosley east of town is the
lucky possessor of a gas well that has
pressure enough to supply his house.

Three rinks shipped by Ringrose,
Wyatt and Moffatt went to Okotoks
on Monday to attend the hospital at
that place.

Watch for the date for "The Talk of
the Town" at the Rex, which owing
to missing connections on the train,
has been delayed.

Mrs. Clark was nominated on Fri-
day for the Public School Board to
fill the vacancy caused by the with-
drawal of Mr. Milnes.

T. C. Larsen and J. W. Hallett were
nominated on Friday for the town
council to fill vacancy caused by the
resignation of Geo. Ringrose.

"The Rex is starting a serial film,
"The Brass Bullet," February 19 and
20. Remember the date and don't miss
the opening installment.

Short courses will be held in the
School of Agriculture, beginning on
February 17th and closing February
28th. The announcement appears in
another column of this paper.

Pte. F. B. Milstead and Pte. O. C.
Kelly have written from the front to
friends here expressing their appreciation
and thanks for the Xmas
parcels from the Red Cross Society.

The Rex Theater has secured "The
Doctor and the Woman" for the big
special bill on February 10 and 11.
Mildred Harris appears in the title
role and this play is one of her best.

While in Calgary on Thursday
morning last week Mrs. John Fraser
had the misfortune to make a mis-
step in coming down stairs and in the
resultant fall fractured her left wrist.

Will farmers who are contemplating
selling by public auction this spring
please get in touch with the auction-
eer as soon as possible so as to secure
the best dates possible for an early
sale—Albert E. Strange.

Geo. Ringrose resigned his position
on the town council at a recent meet-
ing of the council. George has been
a very energetic member of the council
and town all reports has rendered
the town excellent service.

Fraser & Peck report the following
recent land sales: Dr. Baker, of
Tova, 160 acres to J. P. Strange; Chas.
Orr, of Stordely, 160 acres to Mr. Bates;
Chas. Derek, 320 acres to R. S. Laing;
Geo. Todd, 320 acres to Frank Brown;
R. S. Laing, 160 acres to Geo. Barr;
Mrs. Clark, of Tova, 640 acres to
Caroline; Alexander McKay, 160 acres
to Frank Brown.

Maurice Wall, Miss Clinton and
Miss Mause motored to Calgary on
Friday last week to attend the
grand opera in that city. Maurice
says that the music was the best he
had heard for some time, and he also
was much impressed with the con-
tents.

Pte. Carl Edlund, son of John Ed-
lund, returned home from England
last Monday night. He was badly
wounded at the front and has been in
hospital in England for some months.
He is now recovered and looks little
worse for his experience. As a sou-
venir of his experience at the front he
brought home a large jagged piece of
German shell which the surgeon
removed from his shoulder.

Remnant Sale

Thursday and Friday, February
6th and 7th, will be clean up days.
All remnants and odd lines will get
the move-on sign. Do not forget the
Store, at 22nd Ave. W., Calgary.

Cleanses the Blood, Builds Up Strength, Improves Complexion

As a result of debility, sickness or improper diet, the blood often becomes weak and unable to give itself off poison.

Morbid, unhealthy matter accumulates and breaks out sores that discharge and will not heal. Vascles, salves and ointments are useless because they have no action on the poisoned blood.

But Dr. Hamilton's Pills cleanse and enrich the diseased blood, drive the impurities and fill it with nutrient and strong building material.

Eczema, boils and sores heal up. Likewise all weakness due to impoverished blood is cured by these famous pills, and anaemia, erysipelas and rheumatism go before it as chaff before fire.

The skin grows smooth, complexion clears, health, vigor and strength are evident on all sides.

A blood remedy for blood diseases, the formula of a famous physician—its ingredients can be made on Dr. Hamilton's Pills.

Their use extends to the people of many nations and thousands have proved that they cure when all else fails.

No matter what your ailment may be, if it has its origin in the blood, it is curable with Dr. Hamilton's Pills. Suffer everywhere, 25c a box.

Will Voyage on Floating Ice Cake

Five of Stefansson's Followers Attempt New Venture

Vilhjalm Stefansson has arrived in New York city after a long trip of polar exploration. He spent more than five years in the arctic, roughly, between North Alaska and the Pole, during which he discovered several islands, including one about the size of Ireland, and disproved the existence of another larger island which had been placed on the map.

The most dramatic part of his work is now in progress, although Stefansson himself was unable to participate in it.

This new venture is the attempted voyaging of five of his followers on a floating ice cake to the top of the earth from a point north of Alaska to a point two hundred miles north of the Arctic. At about latitude 73 north, longitude 188 west, he would camp on a cake of ice probably late in April and drift where the ice led, taking continual soundings and frequent astronomical observations to plot our course carefully. It is impossible to carry on sledges food for that sort of a trip but our work in the last five years has shown that carrying food to the Arctic is like carrying coals to Newcastle.

In pursuance of this scheme I spent the fall of 1917 in buying the best available dogs and in having eight good sledges made with which I intended to start in February from Cross Island, on the north coast of Alaska, with an immediate objective two hundred miles to the north and plan was well under way, when January 9, 1918, I was taken with typhoid fever. As this was a serious illness and followed by pneumonia, it soon became evident that I could not do the work myself.

The task then fell to Storcken, who would otherwise have been chief assistant on the trip. With ten sledges and about eighty dogs, he left Cross Island on March 1.

After travelling about one hundred miles, he sent back his first support party. April 10 he was two hundred miles north of Alaska and was ready to send back his last support party.

"The report that Storcken sent back indicates that he was going to travel another fifty or seventy miles farther north before finally selecting an ice cake to camp on.

"Most of the ice in that region is many years old, thickened by being crushed and heaped up in ridges and cemented together again by the low temperatures. Some blocks are thirty to fifty feet thick. I would choose a cake about thirty feet in thickness and not more than half a mile or a mile square in area. The main task of the summer is to put up the sleds for the winter, and the closer open water is to the camp, the less trouble in getting sleds.

"Storcken is doubtless camped on some such cake. On a good sunny day one is likely to get from three to five seals. These he would skin in such a way that the skin would form bags, which he would fill with blubber, the blubber of four seals going to make one full bag. The skin he would slice thin and stretch out in the sun to dry, this being his sledge pro-

visions for the journey landward the coming year.

After this polar bears would become the most freely obtainable food. In our past experience one cartridge has averaged to about 125 pounds of meat. As polar bears frequently weigh 1,000 pounds, Storcken would be able to bring considerably the meat gathering average of our ammunition. Each animal he kills will furnish as much blubber as it does meat, on the average. The seals furnish a little more blubber than meat and the polar bears a little more meat than blubber. By October, when winter really sets in, Storcken probably had a great many tons of meat and fuel, enough to last all winter.

"If his course held true I imagine he would drift about two hundred miles a month at the start and a little slower later on. As soon as the cold settles in, snow houses would be built and the party would live in comfort. I don't see the party in any great danger unless the ice in their immediate vicinity should break up during the dark period of winter. Should they be compelled to remove their camp from an ice cake that is breaking up to a more fortunate location nearby, they might in the process of moving, lose considerable part of their supplies. This I do not think likely to occur. We fully realize the danger, but consider it only a legitimate risk.

"If our calculations are correct, late in February, 1919, Storcken's party should be northwest of New Siberia, one hundred or two hundred miles farther north than the point where the Japanese sank. From here they would start as soon as daylight allowed it for the month of one of the great Siberian rivers, perhaps the Lena. To reach the Siberian mainland they would become a matter of weeks.

"Storcken's party consists of four men besides himself: Gustav Masik, a Swedish seaman second mate of our vessel, the Polar Bear; Lorn Knight, 25 years old, an American, whose parents live at McManville, near Portland, Ore.; O. G. Connor, of Buffalo, N. Y.; and Martin Kilham, a Seattle boy about 20 years old, the ideal age for men in subordinate positions in polar work."

Why Build in 1919?

Combination of Circumstances Which Will Bring Revival of Building

There never was a time when Canada, from coast to coast, needed building up so much as right now. Public works, railway construction, municipal improvements and housing in cities and towns, all figure in the after-war revival of building. Naturally, there is a tendency just at the present time, for holding back with the expectation that labor and materials will ease off, but as soon as the spring of 1919 opens we may expect to see many new projects started. Our railway systems need to be overhauled, our canals and docks need repairs and extensions, public highways must be constructed, warehouses, factories, and residences must be built. The shortage of coal has brought home to us all the importance of developing our coal mines, and our timber industry has bright prospects to be kept active in the rebuilding of shattered Europe.

Already the federal government has taken a firm stand in going ahead with many big public works that were held up during the war. Municipalities having had their borrowing restrictions removed, are doubling their budgets this year, to provide for the necessary work that has been shelved since 1914. Manufacturers and merchants are relaxing that tendency with the spirit of the times, extensions are needed. A general survey of housing accommodations in cities of 25,000 population and over goes to show that a serious shortage of houses exists all over the country. In summing up the situation, it is west there is a combination of circumstances that gives reasons why building should go ahead in 1919. These might be classed as follows:

That with the speedy return of our soldiers from overseas it is imperative that employment should be provided.

That factory facilities for producing construction and building materials are available at all points.

That there is little danger of labor troubles during the demobilization and reconstruction period, as skilled mechanics, laborers and men of industry, are all displaying a spirit of "give and take," that makes for safety.

That contractors who have been hard hit during the war are willing to take small profits on contracts.

That prices for building factors and warehouse sites, and for homes, are much cheaper than in pre-war years.

That our railways are better able to make quick and sure delivery of materials than in the same seasons of war and pre-war days.

That in stimulating the building trade, it means that subsidiary trades will be kept going and the flow of pay rolls, which in itself, spells prosperity.

That in public works, railway construction, municipal improvement and building generally is proceeded with, it will show the world there is no Canadian lack of funds.

That in the other lines, and in more capital, industry and immigration.

That reconstruction and capital is what Canada needs. Take western Canada, two-thirds the size of the United States, having a population of less than one person to the square mile, while Great Britain has 470, France 190 and the United States 334 persons to the square mile.

Conditions Canada will be the magnet for men and money, during reconstruction. Following the civil war people scoffed at the idea that Chicago would ever become more than a healthy lake town, but agricultural and commercial conditions demanded a great city on the spot where Chicago now stands. So it is with many of the cities of western Canada today, with this difference, that no country in the history of the world has attracted to its borders a larger number in so short a time, previous to the war, than has the Canadian west. The fact that large American financial institutions are already establishing branches in Canada and that Canadian banking houses are extending their services in Great Britain, Europe, and even in the far east, gives hope to Canada of being in a position to participate in foreign trade to a considerable extent.

During the war years Western Canada was favorably known in all civilized countries. Canadian soldiers broke the ice of cold storage, representing 191,000 tons and that by next October it will have one cubic foot storage for every man, woman and child in the United Kingdom. The cost of storing to date, he showed, was \$15,000,000.

Character must be distinguished from reputation. Reputation is what man seems to other men to be.

FARM ARCHITECTURE AND BUILDING

A Compact Six-Room House

ing, real estate, industrial or commercial development, should come to come back in the near future, in great volume than ever. The come-back will be gradual and no boom can be expected. Cost of labor, cost of materials, and cost of capital, are elements entering into the speedy revival of building. There must also be a working level, a vision of Canada's future, with united effort of all classes interested to get together, in the surest, swiftest and safest way to solve our reconstruction problems. As Kipping says:

"It ain't the guns or the armament, or funds that they can pay, but the close co-operation that makes them win the day. It ain't the individual, nor the army as a whole,

Has Modern Lumber Mill

Equipped With Machinery of Heavy Pacific Coast Type

Prince Rupert, B. C.—The new saw mill at Prince Rupert is one of the largest and said to be the finest modern on the Pacific coast. It was designed with a view to efficiency and low cost of production. The plant consists of a saw mill, single mill, planing mill, dry kilns and storage sheds, with the possible addition of a box plant later, and will have a daily capacity of 125,000 feet of lumber and 150,000 shingles. The saw mill is of extra strong construction, 40 feet by 250 feet, two stories high and is equipped with machinery of the heavy Pacific coast type. A log lift is employed for taking the logs into the mill instead of the old type truck ladder, and this particular lift is an innovation in that it is a double lift having two sets of cables, the one delivering the logs to the saw mill and the other throwing the logs to the shingle mill deck. A reversible engine of the twin feed type supplies power for the lift and is entirely independent of the other machinery in the mill.

British Shipbuilding

LONDON.—During the last quarter of 1918 there were begun in Great Britain 424 ships, having a total tonnage of 1,979,852, compared to 305 ships with a tonnage of 1,866,397, during the same quarter in 1917, according to authoritative figures. Ships now actually under construction in the United Kingdom have a total tonnage of about 235,000 greater than during the quarter ending in September, and about 113,000 greater than one year ago.

To Send Many to Convention

DETROIT.—It is announced that the convention of the National Association of Builders' exchanges will be held in Milwaukee the last week of February. Many important matters growing out of the readjustment of the industry, following the close of the war and the removal of building restrictions, will be considered in the convention. The Detroit Builders' and Traders' exchange intends to send a large delegation, and arrangements to that end are being made.

This compact dwelling has been designed with all the conditions for convenience and comfort in a western Canadian home definitely in mind. The small closed porch with the pantry in the rear forms a double break between the kitchen and the rear entrance that will make both for convenience at all seasons and comfort in winter for the housewife. The other details of this home have received similar careful consideration by the designer. Note the convenience of ample closet accommodation of the bedrooms, and the linen closet.

Put an extra wrapping of Para-Sani around the package before putting it in the final covering. Bats and smokes will arrive as fresh as when shipped, if wrapped in Para-Sani.

Licensed Auctioneer

Farm Sales a Specialty**Without Music You Cannot Live a Full Life**

Music is now recognized as a necessity in the home. Music feeds the soul, as food feeds the body and literature feeds the brain. Next to religion, it is humanity's greatest comforter.

The New Edison opens the doors to the world of music. It brings the supreme art of the greatest singers, instrumentalists and musical organizations to you with such unerring fidelity that the artists themselves could give you no more.

The NEW EDISON

"The Phonograph with a Soul"

does not merely imitate; it actually re-creates.

Before audiences totalling more than two millions, thirty great artists have conducted tone tests which proved that no shade of difference could be detected between the artist and the instrument. They have sung in direct comparison with the New Edison, then suddenly ceased, permitting the instrument to continue alone. The only way the listeners could tell when the artist stopped was by watching his lips. And with the lights lowered, they were unable to say when it was the living voice they heard and when the New Edison.

Could a more convincing test than this be devised? Doesn't it prove the truth of our assertion that ownership of the instrument is equivalent to having all the great artists of the world literally at one's command?

Come in and hear the New Edison here, or allow us to send one to your home, where you can hear it at your leisure.
